This day-long conference will explore, and compare a range of issues and experiences relating to the surveying, recording and inventorisation of modern urban ensembles - including issues of organisation, agency and definition as well as technical and IT aspects.

The conference will comprise three elements: firstly, a morning session of lectures, at the University of Edinburgh College of Art, by speakers from various countries, followed by a discussion; secondly, an early-afternoon field visit to a major postwar suburban development area, including an on-site demonstration of local community-based digital records; and an evening keynote lecture back at ECA by Poul Sverrild (head of Forstadsmuseet/Museum of the Suburb, Hvidovre/Brendby, Denmark), as part of the SCCS Masterclass Series.
